THE INTERIOR HARDWOOD CO.

INDIANAPOLIS, IND. U.S.A.

Parquetry Floors

CONSIST OF strips and blocks of Hardwood, fastened together at edges and on backs, in slabs of convenient size for laying. They are made a solid part of the floor by being nailed down to the under floor. They are then finished with Wax or Parquet-lac so as to heighten the natural beauty of the wood.

They are made beautiful by the contrasting colors of the different woods employed, and the weaving effects produced by changing the direction of the grain in the perfectly-made joints.

They have been made after this method in Europe for centuries, and are no experiment. They are established here and have come to stay.

To those interested, we will mail small sample that they may understand the work we offer.

All prices named are for goods 5-16″ thick, uncut and measured before laid. Prices for any design in 7-8″ thick will be given on application.

We make no charge for plans or estimates furnished, if returned to us.

Parquet Floors and Borders.

IT IS to present proper combinations of Fields, with appropriate Borders, that we issue this collection of Designs. In correspondence with us, do not deface or tear the sheets; simply refer to Page and No. The woods named in each pattern are as they are regularly made, and are in stock.

Copy of our regular Book of Designs, showing other patterns, will be sent on request.

Drawings will be submitted, showing change in Fields or Borders. Borders can be made wider with strips to good effect, and plain Fields of Oak Strips or "WOOD CARPET" can be substituted where preferred.

When writing for suggestions, it is well to name the color of woods in doors, mantels, furniture, etc., that the woods employed in the Border and Field may correspond and harmonize in each room.

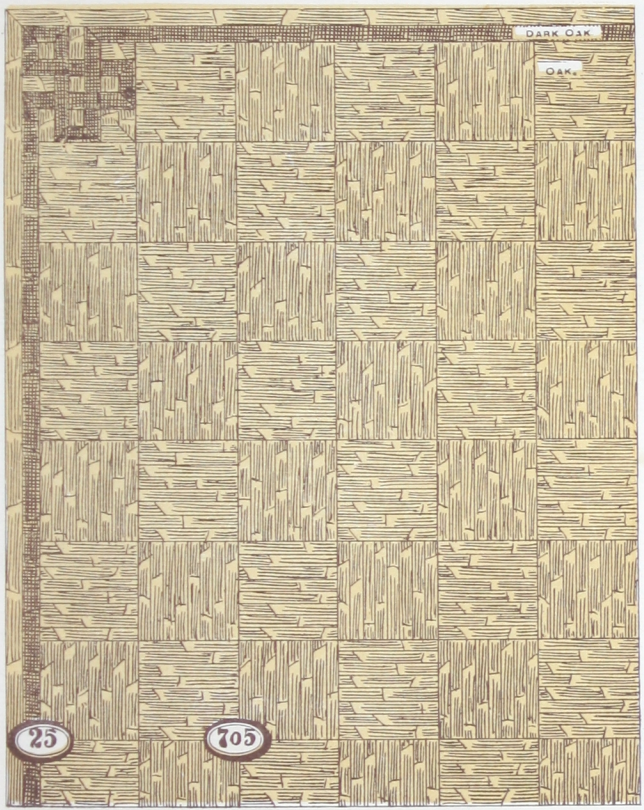

Borders are shown herein by cutting the turn to a mitre, which is the more artistic method. However, all patterns in borders do not mitre equally well, and for such, or where preferred, Corner Blocks to suit any pattern can be furnished. We make estimate for any pattern of Border to any circle.
